

# Project Brief

## *I-215; 4500 South Structure*

**2007 Legislative  
Update**

**Provided By:**

### **Project Description: Construction, Bridge Replacement**

The I-215; 4500 South Structure Project has been chosen as Spotlight Project by the Federal Highway Administration under its Highways for Life Program. The project includes replacement of the bridge spanning I-215 East at 4500 South using an innovative accelerated bridge replacement process. The project will impact I-215 East and Wasatch Blvd. traffic to and from the Holladay City business district, to the southwest, and office buildings and a Middle School, to the east. The 4500 South on-ramp to I-215 is heavily used by residential and business traffic in the area.

**A Public Information Manager** will be hired for this project to keep local businesses, residents and commuters informed of construction impacts.

**Commission  
Approved  
Project Budget:**  
\$6.6 million

**Anticipated  
Schedule:**  
Construction –  
Spring to Fall 2007
